

MEMORANDUM OF AGREEMENT
between
Briercrest College and Seminary
and
Minot State University

Henceforth in this document Briercrest College and Seminary will be identified as the “College” and Minot State University will be identified simply as the “University” (recognizing the College of Education and Health Sciences as the ‘lead’ academic unit).

Re: Terms of Reference for the development of a concurrent program of studies that will lead to degrees being awarded (separately) by both Briercrest College and Seminary and Minot State University.

Preamble:

In recognition of the mutual interests that may be served - as well as the goals that may be achieved - Briercrest College and Seminary and Minot State University are agreed upon the following *Terms of Reference* as a basis for proceeding with the development of a program of study that will lead to these degrees being awarded by each of the two partnering institutions. The purpose of the agreement is to establish a framework for creating a program of study that will lead to the degrees identified below.

Degrees to be awarded:

Bachelor of Arts (B.A.)	Briercrest College and Seminary
Bachelor of Science in Education (B.S.E.)	Minot State University

Terms of Reference:

Admission

1. The distinctive admission policies and procedures that pertain to the College and the University will be honoured; each institution’s policies and procedures will apply (separately) to students who seek admission to each of the respective institutions in the partnership. Both the University and the College will adopt a competitive, direct entry model of admission to their degree programs associated with this partnership.

2. In keeping with the above, students applying to the College and the University will require separate acceptance from both of the partnering institutions.
3. It is intended that the College will attempt to create a cohort of 20-25 students who will be accepted into the concurrent program each year (the College and the University's College of Education and Health Sciences will each have a concurrent programs 'track').
4. Students admitted to the program by the College who meet University admission standards will be admitted by the Teacher Education Unit into any of the programs for which they qualify, based upon students' stated preference and quota spaces in these programs.
5. Every effort will be made by the University to accommodate the College's opportunity to 'backfill' spaces (student seats) in the program that become available due to attrition.

Structure

6. The intent of both parties is to create a "3 + 2" program - three years at the College, followed by 2 years at the University.
7. Notwithstanding the "3 + 2" structure, some University courses may be programmed into the 3 College years, and some College courses may be programmed in the 2 University years.
8. Of the 2 University years it is understood that at least one will need to be fully "on-campus" at Minot State University, and that an additional full semester (in the second year) will be devoted to a 4-month Student-Teaching program.

Time-line

9. It is intended that the first cohort will begin taking courses in September, 2011.

Marketing

10. This agreement shall be recognized by both parties as a 'partnership' program (between the University and the College); however, it shall not be identified as a 'joint-degree' program.
11. The program shall be described as a "concurrent degrees program" inasmuch as two distinct degrees are being offered by two distinct institutions of higher education. The full description might, therefore, include the phrase: ".....a partnership, concurrent degrees program sponsored by Briercrest College and Seminary and Minot State University."
12. The College and the University will use the official logo of the (other) partner institution in program brochures and other literature related to the concurrent degrees program.

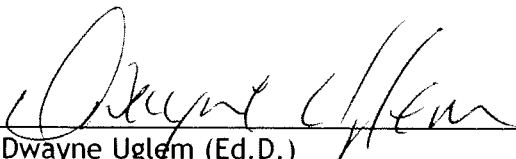

Costs

- 13. Students will pay tuition to each of the partner institutions based on the academic identity of the courses taken: tuition for College courses will be remitted to the College, and the University will receive tuition for its courses.
- 14. It is understood that for the most part the costs associated with each of the degree programs (B.A. and B.S.E.) are normal to their home institution and would be covered by the tuition payments.

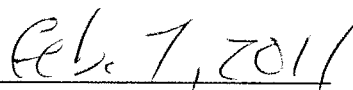

Monitoring and Review

- 15. The College and the University shall each name a principal contact person/office related to the partnership program; further, this individual (office) will be responsible for coordination related to the partnership program and the flow of communications within their own institution.
- 16. Each of the appendices outlines programs of study that have been approved by both the College and the University. Naturally, these programs of study will continue to evolve (and some may be added) but any modifications must be approved in writing by both the College’s Vice President Academic and the University’s Dean of the College of Education and Health Sciences.
- 17. Notwithstanding the intent of both parties to maintain regular communication, in the interests of maintaining strong program support a “*Management Advisory Group (MAG)*” will be created, and shall meet at least once every year. Members of the MAG will include at least three representatives from each of the partnering institutions, the College and the University.
- 18. This partnership program shall be reviewed after 5 years (from the signing of this Memorandum of Agreement)—that is, in 2016.

¹ Students may take one of HIS 200/201 Canadian History survey if they take both of HIS 210/211 American History survey. Students should be advised that both sections of the American History survey must be taken, either at Briercrest College or Minot State. The American History survey fulfils both the General Education requirement and, if both courses are taken, the Chronological Survey requirements. Students may also satisfy the Chronological Survey—but not the Minot State General Education—requirement by taking HIS 200/201 History of Canada sequence. At least three credit hours of HIS 200/201 are required at Briercrest College.

² Students must take 21 semester hours of Distributed History electives.
